

wide-view sensor mirror

see yourself in the best light

Under the wrong lighting, makeup colors can fool you. Our tru-lux light system simulates natural sunlight for the brightest, most color-correct view.

The wide-view sensor mirror is also app-enabled. Using your phone, you can capture and view custom light settings, adjust brightness and set a soft alarm or timer.

features

tru-lux light system

At 600 lux and with a color rendering index (CRI) of 90, the tru-lux light system closely simulates natural sunlight and the full color spectrum so you see your makeup in color-correct detail.

capture custom light settings

Use the app to capture and recreate the lighting from the office, the gym or anywhere you want to look your best.

confidence at any angle

A wide viewing area and folding side panels allow you to make sure you look great from any angle.

dynamic sensing

Lights up automatically as face approaches; sensitivity increases during use so mirror won't turn off unexpectedly.
